

Love Him Love Them

Give Hope, Touch Lives, Change Hearts

Goals for Mission Trips

- 1) Need to build a security wall around the Valley of Hope Complex. It will entail mixing sand to make concrete blocks, set the blocks up and lay block on top of each other to complete.
- 2) Once the security wall is built we will need to create a gate and install.
- 3) We need people to come in and teach classes on landscaping. It will encompass educating the villagers on what will grow in Haiti and how to develop a plan.
- 4) Once a design is decided on, we will need to clear the land, add the proper materials and install plants.
- 5) As part of the design we would like to build a gazebo.
- 6) We need carpenters to come down and build 2 houses for two different families that need homes.
- 7) We need electricians to come in and run wires for our hospital, transition home.
- 8) They can come and conduct Vacation Bible School with the children of the village
- 9) We would also like people to come in and teach the children how to play board games. This will help them with their Math, English and other skills.
